Release Notes

aqua
aligned quality assurance

Date   25.09.2017 10:29:27

All changes since   17.1.3.0

Version   17.2.1.0

New features

ID	Name
RQ032598	[aquaweb] Add attachment to test step description
RQ032597	[aquaweb] Add attachment to test step in execution
RQ032639	[aquaweb] Add testcases to existing test scenario
RQ032610	[aquaweb] Automatic start of edit mode
RQ032715	[aquaweb] Collapse all button for project tree
RQ032615	[aquaweb] Combine user view with already configured filter
RQ032587	[aquaweb] Context menu should allow to add test cases to a test scenario
RQ032601	[aquaweb] Create dependent items
RQ032593	[aquaweb] Create new defect from test case execution
RQ032592	[aquaweb] Dependencies from executions and test steps in a given execution to defects
RQ032310	[aquaweb] Full text search
RQ032355	[aquaweb] Graphical dependencies
RQ032713	[aquaweb] Grid optimizations e.g. highlighting of editable fields and improved column sizing
RQ032711	[aquaweb] Improved info notice (toast)
RQ032737	[aquaweb] Indicator if content is available
RQ032594	[aquaweb] Link from testcase execution to testcase
RQ032719	[aquaweb] Local execution visible in test case grid of test scenario
RQ032707	[aquaweb] Moving folders (via cut+paste)

RQ032596   [aquaweb] Notify other user on item

RQ032365   [aquaweb] Path to item in footer

RQ032716   [aquaweb] Preview: keep details collapsed on selecting other item

RQ032401   [aquaweb] Report options

RQ032712   [aquaweb] Ribbon: Enable Keyboard-Shortcuts via F10

RQ032714   [aquaweb] Scrollable item details

RQ032646   [aquaweb] See defect suggestions on finishing test execution

RQ032311   [aquaweb] Send emails on specific state

RQ032400   [aquaweb] Show dependent items

RQ032647   [aquaweb] Test it! ribbon button for accessing dependent test cases and test scenarios

RQ032374   [aquaweb] Tooltip for Links

RQ032379   Email notification about item assignment

RQ032402   Multi-project reporting

RQ032595   Searching via API

Solved Problems

ID	Name
DF032749	[aquaweb] Cannot create item after renaming status
DF032304	[aquaweb] Continue test execution without setting new passed,failed,... leads to error
DF032670	[aquaweb] Execution buttons in test scenario are not greyed out if user has no right to execute
DF032720	[aquaweb] Formulas saved in web are not calculated correctly in variables
DF032708	[aquaweb] Grouping with last execution status leads to 500error
DF032706	[aquaweb] Javascript exception when refreshing a test execution tab
DF032798	[aquaweb] No socket available when opening too many aqua tabs
DF032700	[aquaweb] Popup blocker can cause Javascript exception
DF032680	[aquaweb] Search field: cursor jumps to end of word if deleting chars in the middle
DF032665	[aquaweb] View created in rich client is not shown in webclient => refreshing projects refreshes views
DF032608	[Filter] Filter with a umlaut is shown incorrectly and does not work after changing project and switching back
DF032612	[Jira] Sync configurator cannot be used with Jira 7.4
DF032638	[Localization] Some context menu items in the agile board are not localized
DF032675	[ProjectConfiguration] Wrong icon on info that template is shared with other projects
DF030187	[Ranorex, Locking] Edit lock not correctly released when editing a script item with utility scripts
DF032385	[Ranorex] Crash on closing Ranorex when Ranorex is opened twice
DF032383	[Ranorex] Save button not active on second save of script change
DF032389	[Renaming of Folders] When renaming a sub folder and the folder above, renaming does not work correctly
DF032799	[Reporting] Parameters from type bool have no label when creating reports
DF032673	[Reporting] Pictures in test scenario descriptions are not shown in report
DF032628	[TestScenarios] Column tested version does not provide history of user entries
DF032245	Exception when switching between projects
DF032616	When creating a testcase via dependent elements, the "default" step and condition is missing
