RQ033362	[aquaweb] Upload and download report templates
RQ033238	[Automation	PowerShell] Update of default PowerShell script
RQ033419	[AutomationAgents] Configurable name for agent
RQ030765	Automatically filled field progress for test scenarios
RQ033412	Support for Ranorex 8

Solved Problems

ID	Name
DF033422	[aquaweb] agent copied to other project does not show running task
DF033421	[aquaweb] agent copied to other project not refreshed properly
DF032850	[aquaweb] Creating a defect in test execution should offer to immediately save the execution
DF033461	[aquaweb] Defect cannot be created if permission "Create Defect" but not "Edit Defect" is set
DF033447	[aquaweb] Duplicated arrows on workflow graph lead to exceptions
DF033768	[aquaweb] Filter 'Is blank' / 'Is not blank' not available
DF033446	[aquaweb] Folder can be cut and paste to subfolder and creates a loop
DF033655	[aquaweb] Grouping with different project and sub-folder values is not working
DF033462	[aquaweb] Inefficient saving of screenshots leads to not saveable items
DF032928	[aquaweb] Internal server error on using filter row
DF033597	[aquaweb] Not possible to scroll down in subrequirement tree (BITV 2.0)
DF033423	[aquaweb] PowerShell agent can not be closed on long running script
DF033815	[aquaweb] Too big error message window for variable import containing values >1024 chars (BITV 2.0)
DF033806	[aquaweb] Too long words in the Instructions field of an execution step can go beyond the actual field (BITV 2.0)
DF033816	[aquaweb] XML Import of variable manager is not working
DF033468	[backend] Unhandled exception might terminate the backend IIS process
DF030881	[Desktop Client | Variable Manager] Strange scrolling during move of grid field in variable manager
DF026490	[Jira REST] Automatic runtime mapping maps too aggressively (especially version numbers)
DF033471	[Jira REST] Edit comment with picture in Jira during a sync error and then Force Merge leads to double entry of picture in Sync and crash sync of item
DF033491	[Jira REST] Fix sync errors incorrectly deletes Jira comments in rare cases when syncing requirements
DF033381	[Jira REST] Merge creates duplicate attachments for screenshots
DF033385	[Jira REST] Merge does not correctly detect if synced comments only differ by the contained images
DF033373	[Jira REST] Multiple images in a single description or comment are not correctly synced from JIRA to aqua
DF033383	[Jira REST] REST sync sometimes injects additional spaces into Jira markup when images are included
DF033397	[Jira REST] Sync sometimes reverts changes done to the description in JIRA
DF033612	[Project Template] It is possible to break the layout such that the project template cannot be edited anymore

DF033455 [Reporting] Reports with script that use dynamic constructs cannot be executed
